An ISO image is a disc image containing the file contents that would be found on an installation DVD. To install from an ISO Image, download the packages and do one of the following:

- Burn each ISO Image to a DVD and install from the DVDs
- Windows - Extract the contents of the ISO file to a temporary directory, using an archiving utility such as Winrar, Winzip, or 7zip. Run setup.exe from the top level folder.
- Linux - Mount the image, using "mount -o loop -t iso9660 filename.iso /mnt/iso" command. Run "./INSTALL" from the top level folder.
